NEWEST AND BEST VARIETIES

New GEMZATA

THREE BIG CROPS
EVERY YEAR

The new Gemzata strawberry is the outstanding everbearer of today for both high quality and heavy production throughout the late spring, summer and fall, producing extra large strawberries, right up to heavy freezing time. The berries are unusually large with rich red meat all the way through, firm and of fine texture. Gemzata has proven successful on a wide range of soils and succeeds better than other everbearers we have tested, under adverse conditions. University and state experimental results show it to be superior to Gem and Mastodon in both quality and production. Gemzata produces well the first season. A cross of the well known Gem and Wayzata, it is a triumph in strawberry plant breeding.

Every garden should have at least fifty Gemzata for each member of the family.

THE MONEY MAKER OF THE EVERBEARERS

cold weather. Excellent flavor berry, very productive, firm and solid. One of the standbys of the everbearing varieties, perfectly hardy.

MOST MODERN AND NEW STRAWBERRY

New EVERMORE

(MINNESOTA 1166)

Giant Everbearer—This everbearing variety will produce continuously through the summer until the late fall. Very easy to grow producing a great many plants. The berries are large, long pointed, growing on lengthy fruit stems of which there are many per plant. Color of the fruit is of the richest dark red clear through the berry, deep rich foliage, vigorous grower, making it ideal for the home garden. Delicious flavor.

One customer reports on 100 plants purchased in the Spring of 1944 an average of one quart of berries per plant.

For quick freezing, just wrap boxes or a case of Evermore berries in paper or cellophane. Don't wash — don't prepare! Just freeze. When you take them out next winter, wash them and they are ready to eat, "sweet as honey." The most delicious strawberry surprise you have ever tasted. The taste test tells.

SALMON BEAUTY

ROBINSON **NEW!**

(June Bearing Variety)
Medium-Late

SCARLET BEAUTY

The New Robinson (Scarlet Beauty) finest June-bearing berry available, originated in the heart of the Michigan fruit producing belt, and is rapidly taking favor over other berries. The fruit is large, conical shape, scarlet-red all the way through. It is very firm and glossy, taking a *premium on the markets*. This is definitely the most outstanding June-bearing variety for heavy production fruit we have ever seen. Delicious for table use. A wonderful canner and preserver. A new berry you positively should have!
